Dear Dr Lin,

Re: Enquiry

RMIT Drug Discovery Technologies (RDDT) was established in 2003 to develop and provide preclinical toxicology and pharmacology services to the Biotechnology, Chinese medicine and complementary medicine industry. RDDT draws on the core capability of expertise within the School of Medical Sciences, Department of Complementary and Chinese Medicine, combining project management, consultancy, a wide range of scientific expertise and quality laboratory infrastructure. The facility is AS/NZS ISO 9001:2000 accredited and currently undergoing accreditation of ISO/IEC 17025:1999 and OECD Principles of Good Laboratory Practice. RDDT conducts a range of standard tests for regulatory purposes as well as customized testing for research purposes.

Dr Chun Guang Li, Director of the Chinese Medicine Research Group and the RMIT Drug Discovery Technologies Group will be able to conduct the following studies under good laboratory practices:

1. Acute Toxicity Test
2. Accelerated Stability Testing

We confirm receipt of the test sample, which will be stored at room temperature.

Look forward to further discussing this with you.

Thanks and regards,

A handwritten signature in black ink that reads "Edna Yeo".
